Donald W. Smith, Manager
King County Airport
Post Office Box 80245
Seattle, WA 98108

Dear Mr. Smith:

Wastewater From King County Lessee-Owned Building Into Georgetown
Steam Plant Flume

It has come to my attention that King County leases property on East Marginal Way to Vic Markov, now sublet to the Boeing Company, on which there is a building unconnected to the sanitary system. As a result, it appears that wastewater from this building flows into a 12" concrete pipe entering the City Light owned Georgetown Steam Plant Flume.

With the assistance of Jeff Winter, tap water that was left on in this now unoccupied building has been turned off, but I am concerned that at some point the building will be used again without an approved means of wastewater disposal. Mr. Winter indicated the building owner has in the past been notified by King County to connect the building to the sanitary system and is now being levied for the required yet unconnected service.

I would appreciate your assistance in eliminating this potential source of pollution into the flume. Please advise me as soon as possible concerning what follow-up there will be to ensure the appropriate improvements are made to connect the Markov building to the sanitary system and to eliminate further wastewater flow onto City Light property.

If you need more details please call Laurie Geissinger at 625-3462.
Thank you.

Sincerely,

Timothy C. Croll, Acting Director
Environmental Affairs Division

cc: Jeff Winter, King County Engineer
